

Cleaning and sanitation.

Dear customer,

we are very pleased you are using our services and we hope you are satisfied with us. Our goal is to make the system of watercoolers an advance for you.

According to our records it is time to clean and sanitize your watercooler so that the water still has the highest quality.

Let us to offer you our service: **cleaning and sanitation**

Why?

Sanitation is necessary for maintaining high quality of water and its bacteriological safety. Another reason is also to remove the film created inside of the machine in places of water flow. This film allows the bacteria to grow. It is necessary to make the sanitation every fourth month. This way you are prolonging the sensitive life of your watercooler.

How?

This device produces ozone. During this process all the bacteria are destroyed. If your cooler is equipped with the air filter after the sanitation we also change it. The air filter absorbs 99,97% of impurities of size 0,3 micron and bigger. We also clean the body of your watercooler.

Where?

Directly in your office or at your home.

How much?

The price is **499,20 Kč** (without VAT) including the transport and the air filter. Payment conditions: invoicing or cash.

Who with?

With our trained technician who uses special device by company Sunrock designed in the USA especially with the intention to clean watercoolers.
